Punching-shear model Blecken CU125

The Punching/Shears Blecken are Universal with 2 cylinders, has concurrent jobs with high stroke cylinders and are independent for each of them.

It is two machines in one set, on one hand hydraulic punch press capacity up to  $\varnothing 50$  mm round neck line punching 500 mm and part cutting station metal profiles:

Cut of plate  
Cutting angle (with varying degrees)  
Cut of solid  
rectangular notching

It has a solid foundation in punching incorporating a T-slot table providing many possibilities of tools.

Features:

Power: 125 Ton

Punching Capacity:  $\varnothing 33 \times 27$

Diameter x thickness:  $\varnothing 50 \times 18$

Neckline: 510

Punching profile "U" (Height): 180

Maximum stroke: 100

Strokes /min (15 mm stroke): 28

Working height: 1050

CUTTIRES:

Capacity:  $610 \times 18$

Width x thickness:  $400 \times 25$

Blade Length: 620

Cutting angle: 100

Working height: 920

CUTTING CORNERS

Capacity:  $610 \times 18$
